Dakar, Senegal

github.com/Sxamuray

PROFILE

Fluent English speaker, comfortable working with international, English-speaking teams.

TECHNICAL SKILLS

Languages

- JavaScript (ES6+)
- TypeScript
- HTML5 & CSS3

Frontend

- React (Hooks, Props, State, Router, Redux)
- JSX Components
- Next.js
- DOM Manipulation

Backend

- Node.js
- Express (routing, REST APIs)
- MongoDB / MongoDB Atlas

Tools & Practices

- Git & GitHub (version control)
- Cloud deployment (Azure)
- AI-assisted / vibe coding workflows

LANGUAGES

English — Fluent

PROFILE SUMMARY

Recent software development bootcamp graduate with hands-on, project-based training in full-stack JavaScript development (MERN stack). Built and deployed multiple real applications covering procedural programming fundamentals, RESTful API design, and cloud deployment. Comfortable working with modern frontend and backend tooling, and productive using AI-assisted ("vibe coding") development workflows. Looking for a junior software developer role to apply and grow these skills in a professional team environment.

PROJECTS

MERN Notes Application [React](#) · [Node.js](#) · [Express](#) · [MongoDB Atlas](#) · [Azure](#)

- ▶ Built a full-stack Notes web application using the MERN stack (MongoDB, Express, React, Node.js).
- ▶ Used MongoDB Atlas for cloud-hosted data storage and deployed the finished app on Microsoft Azure.
- ▶ Implemented create, read, update, and delete (CRUD) functionality with a responsive React frontend.

github.com/Sxamuray/MongoDB

RESTful Notes API [Node.js](#) · [Express](#) · [MongoDB Atlas](#) · [REST API](#)

- ▶ Designed and built a RESTful API with Node.js and Express to handle CRUD operations for a Notes application.
- ▶ Connected a React frontend to MongoDB Atlas through the API, enabling persistent, real-time data storage.
- ▶ Structured routing and endpoints following REST conventions for maintainability and scalability.

github.com/Sxamuray/API

Data Structures & Procedural Programming [Core Programming](#) · [Data Structures](#)

- ▶ Built console-based applications applying procedural programming principles and core data structures.
- ▶ Focused on efficiently managing, organizing, and processing data without a framework, to build strong programming fundamentals.

EDUCATION & TRAINING

Software Development Bootcamp — GOMYCODE

Dakar, Senegal | February 2026 – July 2026

- ▶ Completed an intensive 5-month, project-based program covering web fundamentals, JavaScript, React, Node.js, MongoDB, and cloud deployment.
- ▶ Applied AI-assisted development practices throughout project-based learning to accelerate and refine build workflows.
